The Honorable
Thomas Bevill
Chairman of the H.R.
Appropriation Committee
House of the Representatives
Rayburn House Office Building
Washington, D.C. 20515
USA

Geneva, June 14, 1991

Dear Congressman Bevill,

In view of the important role played at CERN by physicists from the University of Alabama, especially in the framework of the L-3 collaboration under the leadership of Professor Samuel S.C. Ting, I would like to cordially invite you to visit CERN and its research facilities - especially its Large Electron Positron Collider (LEP) - at any date which would suit you in the coming months.

Your visit would also offer an opportunity to discuss together various matters relating to the scientific cooperation between the DoE and CERN, where the long-term planning of high-energy physics investments is concerned. I would be delighted especially to familiarize you with the CERN Project of a Large Hadron Collider (LHC), a research instrument to be installed in the existing LEP tunnel, for which numerous universities and physics institutes of your country are already showing a lively interest.

In the hope of having the pleasure of welcoming you at CERN in not too distant a future, I remain, with best regards,

Yours sincerely,

A handwritten signature in cursive script, appearing to read "Carlo Rubbia".

Carlo Rubbia
